This Union Notes:

1. That the university installed the digital screen on the piazza in 2012.
2. That the screen operates daily until 10pm, from 7am on weekdays, 8am on Saturday and 10am on Sundays.
3. That the screen is used to broadcast news, adverts for different societies and clips produced by the university, such as adverts for university accommodation.
4. That in the past the screen has been used to broadcast Eurovision and other events interesting to students.

This Union Believes:

1. That students can sometimes hear the screen in accommodation as far away as Redfern, impacting sleep.
2. That the volume of the speakers used with the screen fluctuates significantly.
3. That students use the piazza to gather for different activities, especially in the summer months, with activities ranging from demonstrations to having drinks outside.
4. That the noise of the screen often impacts these activities, as conversations can be hard to hold due to the volume.
5. That students with sensory processing disorders can struggle crossing or being in the piazza due to the visual and auditory stimuli of the screen.
6. That the piazza should be a place for students to gather and enjoy shared activities.
7. That in order for this to be possible, the screen and especially its volume need to be reconsidered and readjusted.
8. That especially students with access needs would profit from such adjustments.
9. That readjustments regarding the screen would make the piazza a more welcoming place for students.
10. That the screen can be a good opportunity for the university to display information during open days.
11. That much of the information on the screen is irrelevant to students already studying at Warwick University, for example adverts for university accommodation.
12. That the screen offers an opportunity for societies to increase their public profile.
13. That the screen can be useful to broadcast events or shows which interest students.
14. That due to the above benefits the screen should be kept in place.
15. That many students dislike the screen and its current use.

This Union Resolves:

1. To mandate the DDO and all other relevant officers and departments to lobby the university to make adjustments to the screen and its use so that the piazza can be a more welcoming place for students.
   a. Such adjustments might include but are not limited to:
      i. levelling the audio of different clips and lowering the overall volume of the screen.
      ii. mandating subtitles for all videos on the screen and turning the audio off entirely except on open days or when special events and shows are broadcasted.
      iii. reevaluating the content broadcasted on the screen to exclude clips on accommodation or other content not relevant to current students.
      iv. changing the operating hours of the screen, for example from 8am to 7pm, turning it on later and off earlier, as well as considering to turn off the screen at lunch time.
