

WSU - Dirty Duck - Food

Food Sales Report, January 2026

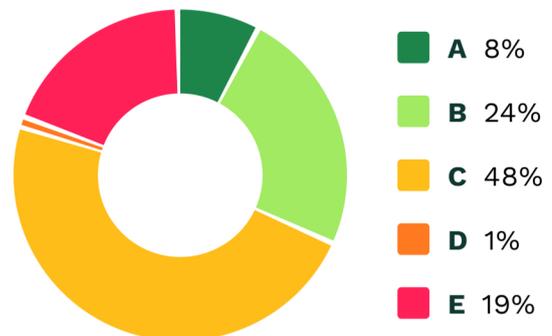

Our environmental report, prepared by Klimato, displays the average CO₂e emissions per average-size meal (equivalent to 400 g of food) as 1.63 kg CO₂e, based on food sales during this period.

Impact calculations provided by the Klimato Database.

Average carbon footprint

Sales per rating

The average emissions of 1.63 kg CO₂e per meal (400 g) for the given period, compared to the selected benchmark of 1.60 kg CO₂e per meal.

A and B ratings align with the Paris Agreement's goal to limit global temperature rise to below 2°C by 2050.
